Platform architecture

The Orgtik suite is a set of Next.js frontends backed by NestJS services. All services share the SOS identity service for single sign-on, scopes and roles.

Service	Responsibility	Stack	Owner
sos-identity	Users, scopes, tokens	NestJS, PostgreSQL	Youssef Ibrahim
file-manager	Folders, files, shares, previews	NestJS, S3, FFmpeg workers	Youssef Ibrahim
task-manager	Projects, boards, sprints	NestJS, PostgreSQL, Redis	Salma Nabil
sales	Pipeline, pricing zones, quotations	NestJS, PostgreSQL	Ahmed Tarek
notifications	Email, push, in-app	Node.js, BullMQ	Mahmoud Gamal

Infrastructure

- Kubernetes (3 node pools) in the Frankfurt region, CDN edge in Riyadh and Cairo
- PostgreSQL 16 with point-in-time recovery (7 days)
- Object storage with server-side encryption; previews generated asynchronously
- Blue/green deployments via GitHub Actions and Argo CD

Security

Short-lived access tokens, per-scope roles, audit logs on every write, and external share links protected by secrets, optional passwords, expiry dates and download limits.
